

**MEMORANDUM OF AGREEMENT
INTER-REGIONAL EMERGENCY RESPONSE AND REMOVAL SUPPORT
REGIONS 3, 4, AND 5
U.S. ENVIRONMENTAL PROTECTION AGENCY**

The purpose of this memorandum is to provide and update the mutual aid agreement for cross-regional emergency and removal response activities among EPA Regions 3, 4, and 5.

1. Authorities

The mutual aid provided under this agreement will enhance the Agency's response to releases of oil, hazardous substances, pollutants and contaminants, which is done pursuant to the authorities vested in EPA under the Clean Water Act as amended by the Oil Pollution Act of 1990 (OPA) and the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) as amended by the Superfund Amendments and Reauthorization Act (SARA) and further defined in the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) 40 CFR 300et. seq. This agreement also encompasses responses which the Regions may undertake pursuant to the Stafford Disaster Relief Act and amendments, and as further defined in the National Response Framework.

2. Pre-Designation and Location of OSCs

Pursuant to 40 CFR 300.120(a), each EPA Regional Administration has pre-designated On-Scene Coordinators (OSCs) for the Inland Zone. The names of the pre-designated OSCs are documented in each respective Regional Contingency Plan (RCP) and their locations are listed in Attachment 1 to this Agreement. Each Region shall update their list of pre-designated OSC within 30 days of each OSC change and send a copy to the distribution list in Section 9 below.

The distribution of OSCs among these duty-stations facilitates timely response activities on the part of EPA throughout the three Regions. Each OSC is able to perform response activities outside of the proximity of his/her immediate duty-station area, and by virtue of this agreement, across EPA regional boundaries should circumstances warrant such involvement. Examples of such circumstances are described in Section 4 of this agreement.

3. On-Scene Coordinator Response Activities

Under CERCLA, SARA, and OPA, pre-designated OSCs perform emergency and removal response activities where:

1. there is a release or substantial threat of release of hazardous substances;
2. there is a release or substantial threat of release into the environment of any pollutant or contaminant which may present an imminent and substantial danger to public health or welfare; and

3. there is a discharge or substantial threat of a discharge of oil to the waters or to the adjoining shorelines of waters of the United States.

These responses can be determined necessary in response to a variety of situations including but not limited to accidental spills, transportation accidents, facility explosions, dumping, criminal actions, terrorism, hurricanes, earthquakes, floods, or other forms of natural disasters.

Pre-designated OSCs can also perform response activities under the direction of other federal agencies. Such responses would most typically involve but not be limited to:

1. Emergency Support Function #10 (ESF10) activations under the National Response Framework, including Stafford Act Disaster Declarations and Federal to Federal Support; and
2. Support to Federal law enforcement agencies, such as the FBI, DEA, ATF, etc.

4. Mutual Aid Cross-Regional Response Activities

It is hereby agreed by the signatories that upon request, the three EPA Regional Offices will assist each other in the following circumstances:

Provisions of First Federal Official (FFO) and/ or On Scene Coordinator (OSC):

A cross-boundary response can be performed where the closest OSC is from another region, or where the magnitude of the response is such that additional assistance is warranted. In accordance with 40 CFR 300.135(b), the OSC providing a cross-boundary support can serve as the First Federal Official (FFO) on scene. As FFO, the OSC providing the cross-boundary support shall initiate and carry out all OSC responsibilities, in consultation with the lead region's pre-designated OSC. The FFO would carry out actions until a pre-designated OSC from the lead region arrives on scene, or until the incident no longer warrants a federal response action.

Provision of OSC Representative for Limited Duration Site Coverage: Very large, unexpected events can result in a level of response work in a region beyond the OSC resource base. This could be due to a regional disaster such as flood or hurricane or simply due to the magnitude of the site or incident at a time when the region's resources are limited or otherwise committed to other regional priorities. In these situations cross-regional assistance can be provided by any of the signatory regions; in which case the OSC from the supporting region would serve as OSC representative for the lead region. The OSC representative would then implement work directed by the lead OSC and would not be expected to take the independent action.

Coordinated Multi-Regional Responses: The region in which an incident originates will respond as the lead region, provided a pre-designated OSC, and initiate response operations including the notification of all appropriate government agencies, RRT's and affected parties within the anticipated area of impact. Furthermore, if the discharge or release moves from one region to another, the authority for leading the

response will also shift between the regions. Conversely, should the incident affect an area that encompasses multiple-regions, the involved regions should all commit OSC resources to a unified incident command structure which would conduct response activities pursuant to NCP 40CFR Section 300.135. Pursuant to NCP 40CFR Section 300.140 there shall be only one OSC in charge of response operations. The RRT Co-Chairs from the affected EPA regions will consult and reach agreement on which region should provide the lead OSC. In selecting the lead region, RRT Co-Chairs shall give prime consideration to the region vulnerable to the greatest threat. Should the consultation among regions result in a change in the lead region, it is agreed that all parties will work together to ensure the transition has minimal impact on response operations.

Incident Management Team Support: In accordance with EPA's National Approach to Response, the National Response Framework (NRF) and National Incident Management System (NIMS) issued by the Department of Homeland Security, each region has:

- Established a Regional Incident Management Team (RIMT)
- Established a Regional Response Support Corps (RSC)
- Provided Advanced ICS Training (up to ICS 400 level) for all OSCs and key personnel

Very large complex events can result in the need for activation of the RIMT. This could be due to a large CERCLA or OPA response, a regional disaster such as a flood or hurricane, planned exercises and pre-deployments, or terrorism. In these situations cross-regional RIMT assistance can be provided by any of the signatory regions, in which case the RIMT (as a whole or specific positions as needed) from the supporting region would be integrated into the requesting region RIMT

Multi-Regional Training and Exercises: In accordance with EPA's National Approach to Response, regions shall conduct Multi-Regional Training and Exercises each year. Examples include RIMT exercises, Level A and air monitoring exercises, and facility spill exercises.

5. Existing Memoranda of Agreement (MOAs)

This MOA is based upon MOAs already in place, which confirm the geographic areas and responsibilities for pre-designated OSCs for pollutant responses. This MOA outlines a process which when applied to the situations noted in this memorandum, further enhances EPA's collective ability to adequately respond to oil and hazardous materials incidents in a timely and thorough fashion.

6. Budgets and Contracts

The Signatory regions recognize the benefits of the OSC in an emergency tasking the contractor(s) most readily available to mobilize to the incident scene. This may

require the use of another region's contractor resources. EPA START and ERRS contracts currently provide the authority to support other regions through zone crossover. This MOA endorses the use of contract resources, wherever available, to respond at the direction of a warranted OSC to any emergency situation.

The lead region is responsible for funding the response action and furnishing, as appropriate, the regional and site-specific accounting and appropriation data to the OSC from the supporting region who is serving as either FFO or OSC representative. When the OSC providing the cross-boundary response is requested by the lead region to assume the role of designated OSC, the lead region will establish, as necessary, appropriate procedures to enable the OSC providing the cross-boundary response to utilize the lead region's contract resources for the duration of the incident.

7. Process for Activating Cross-Regional Support under this Agreement

Requests for cross-boundary support in response to an emergency incident should be made to the supporting region phone duty officer (see Appendix 1). In requesting the support the lead region should specify the type of support required, such as a FFO or merely the provision of technical assistance. In implementing this MOA, each Region will develop and apply procedures, as appropriate that authorize and provide for the immediate dispatch of an OSC by the duty officer in support of the lead region. The phone duty officers from each respective Region are expected to notify and brief their management concerning actions taken pursuant to the request.

Requests for site coverage support and/ or support during significant emergency responses, including a National Response Framework activation, should generally be made during business hours, initiated by the lead Region, and by contact between the respective Removal Managers or their designees. In the event that Removal Managers are not available and/or the support becomes apparent as an immediate need during non-business hours, the respective duty officers will discuss the request and make that decision. Any procedures needed to implement this provision of the MOA will be included with the requirements above.

8. Effective Date

This agreement will be effective upon signature by all the parties, and shall remain in effect until termination by any of the parties. Any party may terminate this agreement upon 90 days written notice to the other parties. The provisions may be reviewed, amended, or supplemented upon agreement of all the parties.

9. Distribution

Final signed copies of this agreement shall be distributed as follows:
Removal Managers, Regions 3, 4, and 5
OSCs, Regions 3, 4, 5,
USGG Districts

USGG- National Pollutions Fund Center
Regional Contracting Officer(s), Regions 3, 4, and 5
Regional Project Officer(s) Regions 3, 4, 5
EPA Headquarters, OSWER/OEM , Program Operations & Coordination Division
Regional Contingency Plan (RCP), Regions 3, 4, and 5

10. Signatures

Ronald J. Borsellino
Director, Hazard Sites Cleanup Division
Region 3

Date: October 23, 2012

Franklin E. Hill
Director, Superfund Division
Region 4

Date: 12/6/2012

Richard C. Karl
Director, Superfund Division
Region 5

Date: 10-17-12

Appendix 1

List of EPA Regions pre-designated OSC locations and Regional 24 Hour Phone Numbers.

Region 3 pre-designated OSCs are presently duty-stationed in the following locations:

- Philadelphia, Pennsylvania
- Stroudsburg, Pennsylvania
- Richmond, Virginia
- Fort Meade, Maryland
- Wheeling, West Virginia

24 Hour Number – (215) 814-3255

Region 4 pre-designated OSCs are presently duty-stationed in the following locations:

- Atlanta, Georgia
- Jackson, Tennessee
- Louisville, Kentucky
- Raleigh, North Carolina
- Tallahassee, Florida

24 Hour Number – (404) 562-8700

Region 5 pre-designated OSCs are presently duty stationed in the following locations:

- Chicago, Illinois
- Marion, Illinois
- Grosse Ile, Michigan
- Traverse City, Michigan
- St. Paul, Minnesota
- Westlake, Ohio
- Cincinnati, Ohio
- Green Bay, Wisconsin
- Indianapolis, Indiana

24 Hour Number – (312) 353-2318
