Training Announcement

Inland Oil Spill Response for DOI – CSP3129

Course Description

This course will be presented by a group of experienced instructors led by a team from Research Planning, Inc. (www.researchplanning.com), including Jacqueline Michel, Scott Zengel, and Chris Boring. RPI is a distinguished leader in oil spill preparedness, response, assessment, and training. This course will cover the many aspects of oil spill response from the DOI perspective, such as what roles DOI staff have within the Unified Command, evaluating and selecting appropriate habitat protection and cleanup methods and cleanup endpoints, being a member of a SCAT team, emergency consultation, and juggling the roles of response and natural resource damage assessment. Oil fate, transport, and effects in inland environments will be covered through basic principles as well as case histories. A drill exercise will be used to apply many of these topics during realistic scenarios. This pilot course is particularly important because feedback from the participants will be used to refine the course when it is offered at field locations.

Objectives

Upon completion of this course, you will be able to:

- Understand the roles and responsibilities of DOI Bureau personnel in spill response and how DOI coordinates during an incident.
- Receive Hazwoper 8-hr Refresher certification.
- Know practical NRDAR response coordination during an incident.
- Demonstrate all knowledge & skills necessary to be performed by DOI Bureau personnel before, during and after an inland spill incident.
- In a mock ICS drill exercise, handle all aspects of coordination, communication, and decision making using guidelines and authorities of ICS; work effectively with EPA, Tribes, and State partners.

Dates

November 14-18, 2016

Location

Atlanta, GA

Who Should Attend

DOI personnel involved in response to oil spills. DOI Training Review team will make final selections of participants for the pilot.

Length

4 days

Tuition

Tuition for all DOI participants is prepaid.

To Register Contact:

Greg Masson 404/679 7223
greg_masson@fws.gov

Barret Fortier 985/882 2011
barret_fortier@fws.gov

Availability

A mix of participants will be selected to represent DOI bureaus for each class.
